

New Electrical Steels Tension Unit

Georg UK have designed and built a new state of the art traversing tension unit specifically for electrical steels for a customer in Poland. The machine has been supplied as part of a complete new line to be installed by the Georg group in 2009. The new machine will provide the customer consistent and blemish free rewind slit coils.

Georg Heavy Duty Furnace Charger

Georg have designed and built a new heavy duty, high spec furnace charger for Timet in Swansea to provide high availability and low maintenance support to their titanium rolling mill system. Slabs of up to 5tonnes are manipulated continuously through a fully automatic control system.

Engineering Solutions For Industry

A Heinrich Georg Group Company

Heinrich Georg 60th Anniversary Year

This year HEINRICH GEORG GMBH MASCHINENFABRIK is celebrating its 60th company anniversary.

Today the family owned medium sized company, meanwhile run in the 3rd generation, can proudly look back to the origin of the company.

In 1948 Heinrich Georg took over the one-man tool shop for cutting, drawing and stamping tools from his father. Starting with a small team of workers he developed revolutionary machines for the metal working industry and lead the company to a globally active enterprise with a constantly increasing number of employees. At present 300 people are working at the Kreuztal headquarters.

Also today empowered with innovative spirit, highest quality and excellent after sales service GEORG can maintain its leading position in the international field of machinery and plant suppliers. With a network of daughter

companies in Great Britain, France, USA, China and supported by a number of representative offices we are close to our customers around the globe.

Georg at Euroblech 2008

This year Georg was proud to take our place at the Euro BLECH trade show in Hanover. We were pleased to receive the loyalty award for being one of the longest attending companies at the show spanning 40 years.

Georg Aids Cogent to Increase Production

Georg has recently designed and installed a new pair of Double Head Uncoilers and a state of the art Wash and Brush Section for Cogent in Newport South Wales on the M3 line.

Within a few weeks the production has already been increased by 30% due to the outstanding success of this project, a similar installation is planned for later this year on the adjacent M2 line.

Multi-Blanking Stacker for Russian Service Centre

Georg UK has recently delivered a new 5 strand stacking machine with a fully automatic width and length setting system.

Two further stacking machines are currently being built in our UK factory for other customers in the UK and Europe.
